Packaged Terminal Heat Pumps (PTHPs) from Ice Air utilize breakthrough Cold Climate Technology to function efficiently and reliably to deliver heat in temperatures down to -5°F.

RSXC PTHPs for new construction employ advanced VRF (variant refrigerant flow) technology to pinpoint the exact level of high-efficiency heating or cooling required for the desired room conditions.

About Ice Air. Headquartered in Mount Vernon, NY, Ice Air develops and manufactures a wide variety of HVAC units for new construction, replacement and retrofit applications. The company's PTHP products are designed to provide years of efficient, trouble-free performance in multifamily housing, hotels/motels, dormitories, commercial buildings and similar projects.
