

Packaged Terminal Air Conditioner for New Construction

# RSNU Series

ICE AIRs RSNU line for new construction offers a durable, whisper-quiet solution with the highest energy efficiency available through the use of R-410A Green refrigerant. The RSNU incorporates advanced features that comply with LEED criteria and prioritizes energy savings, making it an ideal addition to new buildings. The RSNU's durable, user-friendly design is suited to a wide variety of applications, providing balanced air flow and easily programmable settings.

ICE AIRs RSNU unit is the perfect solution for new construction in a durable and user-friendly package.

## Features:

- Ultra-high efficiency – EERs to 12.0
- Advanced tangential indoor blower provides balanced air flow
- Whisper quiet sound levels
- Standard programmable digital touchpad controls
- 5/2 or 7 day programming
- Puron® R-410A Green refrigerant
- Heavy duty, commercial-grade construction throughout
- G90 galvanized steel construction, powder-coated drain and base pans
- Furniture-grade, powder-coated cabinetry
