

PTAC

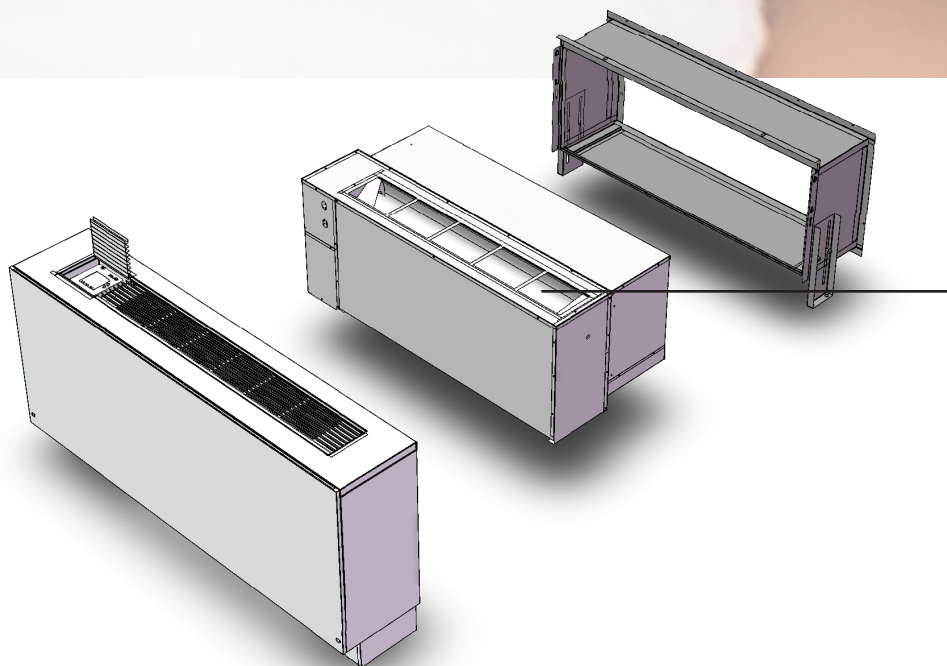

Essential Accessories

INNOVATIVE ACCESSORIES TO ENHANCE PTAC PERFORMANCE!

Breathe fresh with **XstreamAir**

- XstreamAir provides a big boost of ventilation air (15 to 50-cfm; factory adjustable)
- It eliminates the need for separate make-up air systems or uncontrolled window “trickle vents”
- Effective ventilation option that is more cost effective than centralized systems
- An easy path for code compliance
- Available accessory on all Ice Air PTAC, SPAC, FCU, WSHP, WCAC and Vertical Stack VRF products
- Chassis mounted switch to enable/disable fan operation
- Optional motorized damper for freeze protection (used with hot water heating applications)

XstreamAir

XstreamAir adds a fan assist module to the PTAC that provides filtered fresh air 24/7.
