

# Electrifying the rules of HVAC retrofit and renovation.

Up to 25% greater efficiency • Zero emissions • Minimal disruption

## For retrofit, renovation, and conversion projects, Ice Air is setting a new benchmark.

We are the definitive partner for transforming HVAC systems that cut operating costs while elevating comfort.

**Innovation. Expertise. Results.** Maintaining HVAC systems in older buildings are challenging—it's also an opportunity to innovate. Ice Air tackles every obstacle head-on with groundbreaking solutions.

**More cost-effective options.** Ice Air can deliver the best system for any type of building, climate or power source. Unlike traditional manufacturers, we can also modify equipment for difficult projects.

Designed for swift installation and low-maintenance upkeep, our systems save valuable time and resources.

**Leading the charge with All Electric, All Climate Comfort™** heat pump technology provides heating and cooling with up to **25% greater efficiency**, with zero emissions. Plumbing installation and upkeep costs are eliminated, further reducing operating costs.

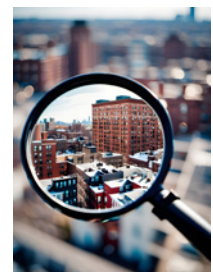

## Conquer Space constraints.

Compact, customizable systems integrate seamlessly into existing structures without sacrificing design or functionality.

## Turn Compliance into a Competitive Advantage:

From navigating regulations to unlocking rebates and incentives, Ice Air's expertise ensures your building passes inspection, achieves compliance, and cuts operating costs.

## The future of HVAC is profitable, sustainable and available now.

Ice Air meets and exceeds stakeholder expectations with HVAC solutions. Transform your building retrofitting challenges into a streamlined success.
