15 Beekman St, New York, NY

HPWH

HPWH CHPWs

Scheduled to open in Fall 2023, the 338-foot-tall tower at 15 Beekman St at Pace University will feature residence hall set atop the school's new classroom, dining hall, library facilities and more. The residence hall portion of the building will provide suite-style living with suites accommodating between five and 11 students. Suites will be available in various combinations of single, double, triple and quad occupancy rooms with most students being assigned double rooms.

Owner/Developer

SL Green Realty

Architect

Ismael Leyva Architects

Heat Pump Water Heaters (HPWHs) from Ice Air are an energy-efficient way to provide domestic hot water without the use of fossil fuels. Even in extreme cold, HPWH units offer higher efficiency than natural gas boilers and electric resistance tanks.

HPWH CHPWs comply with the NEEP Cold Climate Air Source Heat Pump (ccASHP) efficiency requirements and can help projects comply with green building systems such as LEED® as well as comply with local ordinances such as NYC Law 97.

About Ice Air. Headquartered in Mount Vernon, NY, Ice Air develops and manufactures a wide variety of HVAC units for new construction, replacement and retrofit applications. The company's HPWH products are designed to provide years of efficient, trouble-free performance in multifamily housing, hotels/motels, dormitories, commercial buildings and similar projects.
